

India's first Mobile App based toy library

TOYS CATALOGUE

Discover Elefant's Unlimited Toys Box, suitable for all ages.

Redefining the way India interacts with toys

Welcome to the EleFant, India's first toy rental mobile app. Our journey began with a simple yet profound idea – to revolutionize the way India interacts with toys and play, while also building the largest fleet of women entrepreneurs.

Designed for ever-curious kids, the EleFant's toys on rent concept helps families be free from toy clutter, offering a convenient, digital way to keep the fun fresh with new toys, so boredom never gets in the way of fun and learning!

Mission

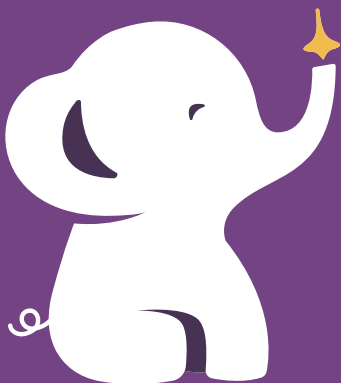

Our mission is to provide children with a diverse range of high-quality toys that nurture their imagination, creativity, and cognitive development. We aim to build a vibrant community of women entrepreneurs who contribute to shaping a bright future for the next generation.

Vision

Our vision is to foster a generation of curious and confident learners through play. We envision the EleFant as a symbol of empowerment, where women lead the way in delivering exceptional play experiences, while parents and children cherish the joy and memories created with our toys.

Our Process

We curate a carefully selected collection of toys that spark imagination and ignite the love for learning. Our process ensures that every toy in our library meets the highest safety standards and cleanliness requirements. With the EleFant, you can be confident that your child's playtime is filled with safe and delightful experiences.

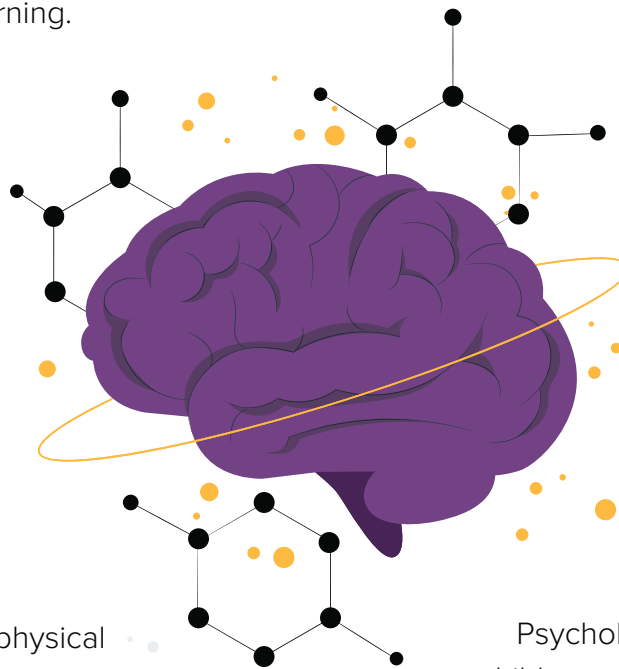

Importance of toys for child's growth & development

Toys are not just a source of entertainment for children but they are essential tools that contribute to a child's neural development. Here are some neuroscience-backed statements that underscore the critical role toys play in a child's growth:

Interactive toys can improve **children's cognitive abilities by upto 15%**, as they stimulate brain functions responsible for problem-solving and learning.

According to studies, youngsters who play with toys can improve their spatial-temporal skills—which are crucial for learning mathematics— **as much as 34%..**

Researchers link regular physical play with toys to a **42% increase** in children's physical coordination, directly influencing their health and well-being.

Psychologists have found that children who engage in roleplaying and dress-up activities can develop their language skills twice as fast as those who do not, showcasing a **50% faster** acquisition rate in vocabulary.

Neuroscientific research has found that during the first three years of life, a child's brain synapses grow at a prolific rate of nearly 700-1000 new connections per second and engaging with toys can significantly influence this neural development.

Introducing the EleFant: A Smarter Way to Play

Dear Parents,

Imagine a world where your child has unlimited supply of toys, perfectly curated to their age and interests, without the hassle of buying, storing, or exchanging them. That's the EleFant way!

As parents, you want to encourage your child's growth and curiosity by providing engaging toys. However, there are so many hurdles in the process. You may have faced some of the following hurdles:

How many?

When you purchase toys, it's essentially a temporary engagement for your child. The excitement fades quickly, and you may wonder how many toys you'll keep buying.

From where?

Buying from traditional stores may offer limited options and subpar quality. On the other hand, navigating large chains or online shopping can be overwhelming. From where can you find the right quality of toys?

What to Buy?

Choosing the right toy isn't easy. Flashy and trendy options abound, but without proper guidance, you might end up with toys that aren't suitable for your child's developmental needs. There's often no easy guide to help you decide what to buy.

Where to Store?

Accumulating a collection of toys can pose storage challenges at home, taking up valuable space and creating toy clutter. Emotional attachments to your child's toys may make it hard to let go, adding to the dilemma of where to store them.

At what cost?

Toys have become increasingly expensive, and buying them individually can have a significant financial impact, especially if your child is a curious explorer. What cost is correct to spend to keep their curiosity alive?

Introducing the EleFant - The platform transforming playtime with toy subscriptions tailored to your child's interests while addressing these common problems:

How many?

the EleFant membership provides unlimited access to over 500+ toys, allowing your child's endless playtime without the worry of how many toys to buy.

From where?

the EleFant offers a hassle-free experience. the EleFant app ensures a seamless process, delivering toys to your doorstep from over **70+ top brands** across the country and facilitating easy exchanges of high-quality toys, eliminating the concern of where to buy.

What to Buy?

the EleFant offers **100% age-appropriate toys** curated by experts, including paediatricians, child psychologists and child educationalists, solving the dilemma of what to buy.

At what cost?

With the EleFant, we have subscription plans to suit every level of your child's curiosity, eliminating concerns about the cost of nurturing their inquisitiveness.

How many subscription plans do you offer?

We offer two flexible toy membership plans tailored to your needs. You can choose the plan that works best for you, whether that's quarterly or annual (usually the best value!). The main difference between the plans is the number of toys you can hold and the number of free deliveries you receive each month.

Where to Store?

The best part about a toy library is that you don't have to worry about storage. Simply return the toys your child has outgrown, and fresh ones will take their place, eliminating the question of where to store them.

Beyond solving these problems, the EleFant Way encourages toy rotation, sharing and responsibility in your child, keeping their curiosity active and contributes to their growth and development.

Discover the EleFant today and start a journey that fosters growth of your child while simplifying your life.

Product Name: Look What My Fingers Can Do! - India centric

- **Brand:** Elemeno
- **Price:** INR 999
- **Category:** Card & Board Games
